

Assignment for File Handling

Instructions:

Solve the following exercises related to file handling in Python.
Write the solution code for each exercise.
Include comments to explain your code where necessary.
Test your functions with sample inputs to ensure correctness.
Write the answers in a Python script file or a Jupyter Notebook.

Exercises:

- Create a text file named "myself.txt" and write about yourself
- Read the contents of the "myself.txt" file and print each line. And append the few lines to the "myself.txt" file
- Create a new text file named "saving.txt" and write numbers as saving amount, each on a new line.
- Read the numbers from the "saving.txt" file, calculate their sum, and print the result.
